# The EU Drugs Strategy 2013-2020:

## Combating Illicit Trafficking and Substance Misuse

### Overview

A joint EU drugs report released by the European Monitoring Centre for Drugs and Drug Addiction (EMCDDA) and Europol describes a market *"which is increasingly dynamic, innovative and quick to react to challenges and one which requires an equally dynamic, innovative and agile response across Europe"*. The repercussions on EU Member States and Norway amount to between 6,300 and 8,400 drug-induced deaths every year.

The EU Drugs Action Plans (2005-2012) have been successful insofar as they have reduced drug-related harm such as HIV/AIDS infections and drug-related deaths. However, an evaluation of the Action Plan (2005-2008) by the European Commission itself stated that *"drug use at EU level had remained high, despite stabilisation or a small decline of the use of some illicit drugs"*. The Commission's new agenda prioritises better data collection from Member States, innovative approaches to fighting illicit drug trafficking and misuse, addressing the phenomenon of legal highs and developing early detection and intervention schemes. It will work jointly with the EMCDDA, Europol and Eurojust to fight drug trafficking and consumption in Europe in the years to come.

With the launch of the EU Drugs Strategy 2013-2020, hopes are high that a renewed commitment to address the gaps in capacity building across the EU will have a positive impact. This special International Symposium provides a timely opportunity for practitioners and stakeholders across Europe to discuss the latest challenges and consider the next steps needed to win the fight against illicit drug trafficking and substance misuse through holistic, multi-level and cross-border approaches.

Public Policy Exchange welcomes the participation of all key partners, responsible authorities and stakeholders. The Symposium will support the exchange of ideas and encourage delegates to engage in thought-provoking topical debate.

***"We will need to continue to adjust our current practices if they are to remain relevant to emerging trends and patterns of use in both new drugs and old. The new EU drugs strategy 2013-20 will need to address a drugs problem in a state of flux and a dynamic and rapidly-evolving drugs market."***

- Director, EMCDDA, May 2013

***"International drug trafficking remains the principal activity of most organised crime groups. They are adapting to new criminal opportunities and changing smuggling methods and routes to evade law enforcement, and we have noticed an increase in the exploitation of legitimate commercial transportation options, such as containers, aircraft, couriers and postal services. This allows drugs to be moved through multiple transit points making them harder to intercept. Internet technology has also emerged as an important facilitator and is commonly used in the marketing and sale of drugs."***

- Director, Europol, January 2013
